

OPTINET™ MINIMUM HARDWARE REQUIREMENTS

Should you have any questions regarding this document please contact the Optinet™ helpdesk on **08453 130 233**

| | |
|------------------|---|
| Operating System | Windows XP Professional , Vista Business or Windows 7 Professional |
| Processor | 2.00ghz (minimum), dual core or quad core (recommended) |
| Memory | Server PC: 4GB Client PC's: 2 GB |
| Hard disk | 150gb minimum |
| Optical Drives | CD-ROM / CD-RW / DVD-RW |
| Graphics | On-board 64mb (minimum) |
| Ports | Serial port connection preferred for connection of chip & pin entry pad. |

Please note:

- **The above are minimum hardware requirements only, the higher the specification computers you purchase the quicker your system will run.**
- **Ensure you main computer (server) is the highest specification of all your computers.**
- **Please ensure when upgrading that you check there are drivers available for additional hardware you own e.g. Printers, external drives, monitors etc. Older items of hardware may not be compatible with newer versions of Microsoft Windows**

Remote Support

- An ADSL connection is required for remote support.

Printing

- The Optinet™ software is developed with Hewlett Packard printers

Data Backup & Validation

- OptiSave™ is our own secure offsite backup & validation service

Networking

- Minimum speed 100mbps, for best performance we would recommend gigabit networking
- Optinet™ Ltd. does not recommend wireless networking.
- Optinet™ Ltd. recommends ADSL/Broadband for internet connectivity routed across all clients, appropriate anti-virus & firewall solutions should be installed.
